EMPRESS, ALTA. THURSDAY, Sept. 12, 1929

Price: \$2.00 Per Year.

United Church

The Church School, 10.30 a.m.
Public Worship, 11.30 a.m.
Services will be conducted at:
Wainford, 1.45 p.m.
Leland Hall, 7.30 p.m.
Social Plains, 7.30 p.m.
You are cordially invited to
worship with us.

Rev. Geo. A. Shields,
Minister.

Antelope Reserve Is

Named Wawaskewy Park

At Rapid Narrows where the South Saskatchewan river at most encircles two townships of land (which were set aside some years previously by the Dominion Govt. as an antelope reserve) is Wawaskewy Park. During the past years under government protection the antelope are on the increase and are reported as coming more and more up on to the farms at frequent intervals by farmers of the Social Plains district. W. J. Little, is the only rancher on the land and is honorary controller of the reserve. Mr. Little, it is stated, is endeavoring to get the government to place a stock wire fence around the reserve for further preservation of these animals. The park is midway between Burgess and Medicine Hat, it is said that tourists have made special trips to the reserve for the purpose of seeing these graceful animals.

A dance will be held in the theatre after the show on Saturday night.

Fuego Oil Co. Expecting To Reach Production

Oil Showings Are Becoming More Pronounced

Mr. McArthur, manager of the Fuego Oil Co. of Oyen, was in town on Tuesday. He reported that drilling at their well is progressing steadily. He reported the bit was having reached 3075 feet and that the prospects for reaching production soon, appeared to be good. He said they were intending to clean the well of water and set the casing, after about another 20 ft. of drilling. On Monday the oil showings from the well had been more plentiful than any brought up in previous bailings.

Geologist Studies District

T. B. Williams, M.Sc., Ph.D., geologist, who had been in town about a week, making geological investigations in the district, for an oil development company, left on Tuesday for Calgary.

Heavy Filing On Alberta Oil Acreage

Lethbridge, Sept. 8.—Another day of filing occurred during the past two days at the Lethbridge branch of the Dominion Lands office. Two blocks of entirely new oil acreage were covered by lease.

C. C. Coulter, American geologist, noting for western Canada and American associations, secured 4,000 acres south of Empress, Alta., and an American geologist, noting for American interests filed on a new structure in Grass Lake district east of this city, but north of the South Saskatchewan river.

The federal government officers were enriched over \$4000 by the two days filing.

It is reported that Hank McDonald, of Bindloss, is proposing building a seventeen-room hotel in that village. We understand that Lester Peers, of Acadia Valley, has the contract for the structure.

STANDING FIELD CROP COMPETITION

Judge Gives Excellent Report on Cleanliness of Fields. Competition Is Marked Success

The judges report of the Standing Field Crop Competition held by the Leland Association of Individuals is a pleasing one. The judging was done on August 3 by Mr. W. H. Jacobs, of the Seed Branch, Alberta Department of Agriculture. In his remarks, Mr. Jacobs says:

There are some wonderfully clean and pure fields of Marquis wheat in this competition. In fact almost any one of the fields inspected could be placed first in any competition. Some of the fields showed infection of Rye and should be rogued over before harvest to prevent the Rye showing in the crop. More or less Russian Thistle and Tumble Mustard was present in all the fields but on the whole they are very clean.

It is just possible that with favorable weather the second prize field may exceed the prize field both in grade and yield. Favorable weather will be required for this, however. The third prize field was scored on account of the presence of a few stalks of Rye and some foreign variety of wheat, probably Freedom. The winning field is remarkably clean and uniform.

The following was the standing of the competitors:

NAME	ADDRESS	Variety	Prize Won	Total Scored

Bulbs Easily Forced For Winter Blooming

There are few house plants that reward the grower with a finer display of bloom in such a short time and, with so little attention as do the spring-flowering bulbs when forced in winter. Those most commonly forced include tulips, hyacinths, daffodils and crocuses, and they come in such variety that the amateur is likely to be bewildered by the long list of names. However, a careful study of bulb catalogues enables one to choose a collection that will give a succession of bloom beginning in early December and lasting until the tulips bloom out of doors in late May.

Bulbs should be potted as soon as they are received in September and October. Those intended for very early bloom may be had in September but the main supplies are not on the market until October. A good potting soil consists of equal parts loam, well-decayed cow manure, leaf mould and sand. The size and style of pot used will depend to some extent on the personal preference of the grower. A six-inch pot will hold six tulips, a five-inch pot takes six crocuses, bulbs, a four- or five-inch pot may be used for a single hyacinth bulb, and a seven- or eight-inch pot will be required for five or six narcissus bulbs.

In pottling, leave the top of the bulb level with the soil and press it firmly about the roots but do not have it too compact beneath them since this causes heaving when root growth takes place.

After planting, water the pots and set them in a cellar or darkened room at a temperature of 40 to 50 degrees Fahrenheit. If the pots are plunged in sand they require less careful watering, and burying to a depth of two inches above the bulbs will help to prevent heaving. After the bulbs are well rooted and the onset of root growth, they may be brought to the living room to bloom. To economize in window space a cellar window or a small window may be used until the plants closely approach the blooming period. If kept too long in a dim light the plants become tall and weak stemmed. If placed in too hot a place the buds will wither, therefore a window close to a stove should be avoided.

After the plants are in bloom, if they are kept in a cool part of the room and not exposed to bright sunshine, the blossoms will last for twelve or fourteen days.

Estrayed

To my farm, Brown, Girdling 8 to 9 years, weight about 110 lbs., branded C. Ostrum, Sex, 10-22-2-4, W. Bindloss, Alta.

Rev. E. A. Torrance

Succumbed To Injuries Sustained In Auto Accident

Death of Anglican Church Pastor Is Loss To The Community.

It is with deep regret that we record the passing of the Rev. E. A. Torrance, Anglican Church Minister, who had made himself extremely well liked by all he came in contact with during his brief stay in our midst. Throughout this appointment parishioners mourn the loss of a man of sterling character. We reprint from the Regina Daily Star the following:

"Succumbing to injuries received when his car was struck by a Canadian National train last Thursday, Rev. E. A. Torrance, pastor of the Anglican church at Empress, died in the Regina General Hospital, Sunday night."

At the time of the accident, Mr. Torrance was on his way to Regina, and was about a mile from Dunblaine when struck by a westbound train. The car, which he was driving, was completely demolished and carried about 300 yards along the track before the train was stopped.

The injured man was brought to Regina after being attended in the Dunblaine station, and at first was not thought to be in a critical condition. He received a fracture to his right hip and several cuts about the face by flying glass, but it is thought that there were also internal injuries which caused his death.

Mr. Torrance was a graduate of St. Chad's College, Regina, and had been pastor at the church at Empress for the past year. He is survived by his mother who lives at Kemptville, Ontario. The funeral arrangements will be in charge of the Spence's Undertaking Parlor.

From word received, it is understood that Rev. Torrance was only conscious for a very brief while after entering the

Anglican Services

Anglican Church services in town are as follows:
11 a.m., Empress, 10th, 11th, 12th, 13th, 14th, 15th, 16th, 17th, 18th, 19th, 20th, 21st, 22nd, 23rd, 24th, 25th, 26th, 27th, 28th, 29th, 30th, 31st.
3 p.m., Cavendish, 11th, 12th, 13th, 14th, 15th, 16th, 17th, 18th, 19th, 20th, 21st, 22nd, 23rd, 24th, 25th, 26th, 27th, 28th, 29th, 30th, 31st.
7.30 p.m., Mayfield, 11th, 12th, 13th, 14th, 15th, 16th, 17th, 18th, 19th, 20th, 21st, 22nd, 23rd, 24th, 25th, 26th, 27th, 28th, 29th, 30th, 31st.
Priest-in-charge, Rural Dean Hackworth, his Maple Creek, alteration

Pool Notes

The Alberta Wheat Pool is making a determined effort to point out to Pool members the importance of delivering grain to Pool elevators as early as it is possible, in view of the light crop in Alberta.

The Pool elevator system built up for the purpose of giving service and protection to the membership. Ten years ago there were 45 elevators in Alberta. Today there are 437, representing an investment of over six million dollars of Pool farmers' money. This investment must be protected.

Pool members should realize that it is a matter of very great importance for the Selling Agency to have Pool wheat readily available at all times. When Pool wheat is delivered to Pool elevators it is always available to the Selling Agency.

This great elevator system was developed because Pool farmers insisted that this course be taken. For years the head office of the Wheat Pool has been deluged with requests and even demands for Pool elevators. Now it is up to Pool farmers to show their appreciation of their own system by delivering their wheat to Pool elevators.

As usual, at this period of the year, houses in town are very scarce.

hospital at Regina. Examination showed that injuries sustained to his head were the cause of death. The body was shipped to his home for burial.

FLY-- AVIATION IS GROWING

The biggest opportunity of the century awaits those who prepare and train now. Be an active student at home, gaining a knowledge of design and construction, navigation, instruments, meteorology, theory of flight, etc. A wonderful course prepared by expert instructors; rates are very low.

Reform Of Electoral Methods

In elections in Great Britain, in Canada, and more recently still in the province of Saskatchewan, all seem to point in the same direction, and to a change in the system or methods of choosing Parliamentary representatives. For many generations the underlying principle of the day system of responsible government has been ruled by the majority of voters as indicated by their selection of party representatives in the House of Commons or legislative assembly, as the case may be. And such a system (as it was) was never wholly representative of public opinion.

For many years, however, the two-party system has been, or is being, replaced by a system of more parties, the weakness of the old system becoming apparent, and the old principle of rule by majority is becoming impossible of realization. On the contrary, at Westminister, at Ottawa, at Regina, each party represented in Parliament is a minority party, and in each instance the smallest of these minority groups has the balance of power in the legislative bodies referred to, and is having the largest representation in the House of Commons.

With the exception of the United States where the two-party system is in favor, partly, perhaps, because it is so interwoven into the fabric of government, national, state, municipal, even county and local, it appears that the balance of power in the House of Commons, Belgium, and other countries having responsible government, is only possible by a coalition of parties, or a working understanding between them. Admittedly, it does not make for strong government or stability in government, France being a notable example.

The multiplication of political parties or groups has, in most European countries, brought about a change in electoral methods. In some, single member constituencies have been replaced by proportional representation, or Proportional Representation adopted, or the second election system inaugurated. Even in the United States the primary system almost amounts to a second election. In a word, it is recognized that the single member constituency where a mere plurality of votes is sufficient to elect, regardless of the number of candidates in the field, no longer meets the needs of the situation.

And it is becoming increasingly evident that it will not for long prove acceptable to the people of Great Britain, or Canada, or in the Provinces of Canada. Opponents of Proportional Representation have always argued that it tends to a multiplication of parties or groups, but the fact now has to be faced that this multiplication has taken place under the existing system. The system itself, therefore, must be altered to meet the changed conditions.

Most politicians will not welcome any change, but they cannot prevent it. The important question is—What basis of representation and method of voting shall be adopted to best meet the needs of the new conditions that have arisen? Already the subject is engaging the attention of political students in Great Britain, and it is certain that the present system of the United Kingdom of the Old Country will undergo some change. Occupying the commanding position he does in the present Parliament, and suffering the handicap of a much smaller representation in the House of Commons than the vote polled by his candidate, the country justice still justifies him to Lloyd George will not long remain content with things as they are. He can, and probably will, demand as one price of his continued support of the Ramsay MacDonald Labor Government a reform of electoral methods and make it a condition of his support to every individual vote cast, and not place third or fourth party candidates at a distinct disadvantage.

Whether the solution is to be found in larger multiple-member constituencies replacing the present single-member seats, with the adoption of the single transferable ballot, or even Proportional Representation, or in a complete change in the accepted form of cabinet responsibility, involving a fixed term for Parliament and Legislature, denial to a government of the right of dissolution except upon a straight vote of want of confidence, and the formation of a cabinet consisting of representatives of all groups, and based upon their respective numerical strength in the House, time alone will disclose.

One thing, however, may be accepted as sound, and that is that the genius of British statesmanship which in the past evolved the best form of democratic government the world has yet known will be capable of meeting the new situation and solving the problems which it presents.

Plane In Freak Accident

Stokes Steam Roller In Making Landing At Roosevelt Field When an aeroplane and a steam roller collided at Roosevelt Field, N.Y., the accident resulted in the plane being destroyed and the roller injured.

James Riddle, piloting a small

monoplane in which two friends were riding as passengers chose for his landing a part of the field which is being leveled off and on which two steam rollers were at work, hidden from the air by the cloud of dust they raised.

The descending plane took off of the motor stack of one of the rollers and bowled the operator, A. C. MacLellan, from his seat, breaking his shoulder. The plane crashed, tearing off the wing and otherwise damaging it beyond repair, but Riddle and his passengers escaped without injury.

Plant Grows Leaves After Having "Sleep"

Replicates Withered Folio In Fifteen Or Twenty Minutes

After being "asleep" for 20 minutes, a plant, recently developed in Germany, produces new leaves. So sensitive is it that if the leaves are touched, or a match burned near them, they immediately wither and fall off. In about a quarter of an hour after the withered leaves have dropped off, new ones grow out. The plant is a member of the mimosa family. It grows in great quantities in India, where it is gathered and sold for commercial purposes. The buried leaves are said to have a high medicinal value in healing burns.

U.S. To Reduce Military Expenses

President Hoover Says Military Budget Not Greater Than Any Other Country

President Hoover intends to establish a commission of army officers within the general staff to see what can be done toward reducing military expenditures.

The commission, the president said, recently, would be charged with making an enquiry to determine what has been made obsolete by scientific advances and could be done away with, and what army programs can be spread over longer period than originally intended and at the same time maintain complete and adequate preparedness.

The president said the purely military expenses the United States constitute a military budget greater than that of any other nation and at a time when he considers there is less danger of war than at any period within the last fifty years.

It is now estimated, he said, that the military budget for 1923 is \$803,000,000, which is \$120,000,000 more than the similar expenditure for the fiscal year just closed, and compares with the \$783,000,000 expenditure for military activities of the army and navy of \$268,000,000 annually.

NEW HEALTH FOR TIRED-OUT WOMEN

Found In The Rich, Red Blood Dr. Williams' Pink Pills Actually Make

Anemia comes on gradually, beginning with languor, indisposition to move, a general irritability and a feeling of fatigue. Later come headaches, frequent backaches and other disturbed ailments, and an inability to obtain rest at night. Cases of this kind, if neglected, become more serious, but if taken in time there is no need to worry. Dr. Williams' Pink Pills can and will do it. These pills actually make the red blood, and thus strengthen every organ and nerve system. They give strength and restful sleep at last. What Dr. Williams' Pink Pills can and will do is shown by the case of Mrs. D. B. Parker, of Harbor Springs, Mich. "I was in a badly run-down condition," she writes, "and my appetite was very poor, and the least exertion would leave me completely tired out. In fact I was hardly able to do any work about the house. I decided to try Dr. Williams' Pink Pills and after taking a few boxes can truthfully say I had gained greatly in health and strength. I was able to go about my work with no sign of former weakness. I can now recommend them to all others who may be in a run-down condition. I feel like a new woman."

Cyclists Honor War Dead Nearly 10,000 bicyclists, many of whom had ridden all night from the extremes of England and Wales, gathered on a recent Sunday morning before the National Cyclists' Memorial, at Bedford, believed to be the largest gathering of cyclists since 3,000 of the cyclists were girls, and most of them were cycling berths. A brief service was held at the memorial, which was erected seven years ago to commemorate cyclists killed in the World War.

For Scalds Or Burns.—Dr. Thomas' Electric Oil is a standard remedy for the prompt treatment of scalds and burns. Its healing power quickly soothes the pain and aids a speedy recovery from the injury. It is also an excellent remedy for all manner of cuts, bruises and sprains, as well as for relieving the pains arising from inflammation of various kinds. A bottle in the house and stable saves many a doctor's and veterinarian's fee.

Alberta Premier Tours North

Party Will Go To Extreme Northern Part Of Province

Hon. J. E. Brownlee, premier of the province, will leave for the north on a four weeks' tour of the north in which they will use railway, power boat, auto and aeroplane.

The itinerary will take them as far as Fort Fitzgerald on the northern edge of the province, then into the Northwest Territories to Gravel Lake and as far as Lake Athabasca on the northeastern corner of Alberta.

They were accompanied by John M. Imrie, managing director of the Edmonton Journal, who joined the party on Premier Brownlee's invitation. This will be the first time in the history of the province of Alberta that the head of Alberta's government and the head of Alberta's University will travel to the extreme northern boundary of the province.

The itinerary also includes a four days speaking tour of the Peace River country by the premier, a visit to the Wood Buffalo Park and inspection of mines and industries in Green Lake and around Lake Athabasca.

Inspector Hancock of the Alberta Police is in charge of all arrangements.

Many Claimants For Czar's Fortune

Three Cornered Legal Fight For Millions Left By Assassinated Ruler

The personal fortune of the late Czar Nicholas II, of Russia, reported to be approximately \$100,000,000, has become the object of a three-cornered legal fight which has led to be tied up in the courts for years.

The Soviet Government is the last party to lay claim to the fortune, much of which is supposed to be on deposit in the United States. Another claim has been entered by a woman, now in the United States, who says she is Princess Anastasia, youngest daughter of the Czar and the only member of the family to escape assassination in the revolution. She is known as Mme. Tschakowsky. Recognized relatives of the late Czar, who claim Mme. Tschakowsky is an impostor, also are fighting for a share of the money.

Keeps a Mouse Farm

Have you ever heard of a mouse farm? There is one at Rayleigh, Essex, where mice are reared just as cattle and sheep are on ordinary farms. There are 50,000 mice, and of nearly every color. Yet, although there are so many, Mr. Tuck, the farmer, can put his hands on any one of them at a moment's notice. About three hundred young ones are born every day, and it takes five hours to feed them all. They are sold to colleges and hospitals for experiments.

Garage For Women Autoists

A garage for the sole use of women autoists has just been adopted by women in London. A club devoted to feminine needs is a feature. Here fair motorists have living rooms and dressing and change rooms, with bathrooms adjoining. Women auto enthusiasts recently dedicated the place with solemn ceremony.

Minard's Liment for Summer Colds.

Reduced Crop Likely To Halt Immigration

Some Of Departmental Money May Be Used To Assist Farmers

The crop situation in Western Canada will have a salutary effect on immigration, it is believed in the capital. The foreignness of Hon. Robert Forke in limiting continental immigration and shutting it off on May 31, is considered as having prevented a more serious situation in the west and relieved to some extent the inevitable burden of unemployment which follows a poor crop year. Mr. Forke has been in Western Canada with W. J. Egan, his deputy, and it would not cause surprise at Ottawa to find that still further restrictions will be placed on continental immigration, and that even British immigration may be pared down.

At present any Britisher can come to Canada at the low rate of \$50. The nominal rate is \$80, the balance being made up by the British and Canadian governments. With poor crops in the west and less employment the Government will guard against an undue influx which may swell the unemployed. Farmers cannot get Association hands through the winter when the crop has been poor and the cities will have enough unemployed with those already here.

There is even a suggestion that some of the immigration expenditure may be diverted to assist the farmers, should conditions develop along the west road as at present. The land settlement board, formerly the soldier settlement board, may be turned upon to keep track of the farmers in the various stricken districts and render such aid as may be possible.

Prince Receives Prize Winner

Successful Marksman at Hsley Also Had Messages of Congratulations

The Prince of Wales received Lieut.-Col. R. M. Blair, commanding officer of the National Rifle Association at Hsley, Vancouver, B.C., at St. James Palace and congratulated him on his success in winning the King's Prize at the recent meet of the National Rifle Association at Hsley. In addition to a host of messages from Canada, Lieut.-Col. Blair is especially gratified by the recognition from the Seaforth Highlanders in the British army, he said. An old lady, a perfect stranger to Lieut.-Col. Blair, has written to the King's Prize man from Guernsey, one of the Channel Islands, expressing the hope that he is a teetotaler.

It Hides Pain Begone.—When neuropathic nerves or humors cripples the back is the time to test the virtues of Dr. Thomas' Electric Oil. Well rubbed in it will still the pain and produce a sensation of ease and rest. A trial of it will establish faith in it.

A notion prevails that no automobile driving is reckless unless an accident happens.

Graf Zeppelin Completes A Third Crossing Of Atlantic Within a Year

Naval Air Station, Lakehurst, N.J., Sept. 4.—The Graf Zeppelin, mighty monarch of the air, today completed its third crossing of the Atlantic within a year.

Last October the huge dirigible completed its first round trip from its base at Friedrichshafen, Germany, to the navy reservation here, where the naval dirigible Los Angeles has its base.

At 5:55 a.m. (Eastern Standard Time) this afternoon, a speck was sighted 14 miles away to the east by Coxswain William Bishop, lookout man for the Los Angeles, and half an hour later the huge silver bag poked its shining nose into the sunset over the field.

Maneuvering in salute to a cheering crowd of almost 100,000 persons, the Zeppelin disappeared over the northern horizon and cruised over New York City before returning to the reservation and where it dropped its landing ropes at 8:48 p.m. It was dragged to a stub-mast on the field, pending its removal into the huge naval hangar which will be its home until it departs on its return journey. The landing was accomplished 95 hours and 10 minutes from the time the ship left its base, 4,175 miles distant last Wednesday night.

An average speed of approximately 45 miles an hour was credited to the big ship up to the time it was first sighted, but the craft slowed down as it approached its destination and rode leisurely to New York, and it was believed that the final computation would reduce the early average. Authorities estimated the Graf travelled 5,331 miles on its latest voyage, including the side trip to New York City, in 94 hours, as compared with 100 hours 58 minutes required to cover a course of 4,575 miles to New York last year.

Tax Receipts Larger

Ottawa.—Income tax receipts for the first quarter of the present fiscal year (ending June 30) totalled \$56,685,317 over the corresponding quarter of 1928, according to the Minister of National Revenue. The gain is attributed to larger incomes received and to more strenuous efforts in the collection of the taxes.

Makes New Record

Port Arthur, Ont.—The plant of the Thunder Bay Paper Company, in Port Arthur made a new record on June 26th, when half a million copies of newspaper were produced in 24 hours, breaking all former records. The record was made by six machines running to full capacity.

London, Eng.—Commander R. G. Bowes-Lyon, cousin of the Duchess of York, has been appointed to command the Royal Yacht "Victoria and Albert" the Admiralty announces.

No Serious Disturbances As A Result Of Anti-War Demonstrations

London, England.—The anti-war demonstration sponsored by Communist organizations throughout the world, passed off peacefully and left large and appreciative forces of troops police in the capitals of Europe with little work on their hands.

The most serious disturbance reported was in Canton, China, where martial law was declared for the day after grenades had been thrown in a government factory.

Although such meetings as were held in European centres passed off quietly, for the most part under close police observation, there were scattered clashes with the authorities and several scores of persons were added to those already in jail.

Gathering under the slogan of "War Against War," Communists over the entire Soviet Union took part in the demonstrations, which also marked the 15th anniversary of Russia's entry into the world war. Hundreds of thousands of persons filled the streets of Moscow in long parades led by brass bands and numberless banners and flags.

Demonstrations on a large scale were held in Moscow, Leningrad, Kharkov and at other cities in which resolutions were passed declaring the danger of a new war and pro-

Development In Aviation

Vancouver and Halifax May Be Linked By Air Route By 1931

Winnipeg.—Unprecedented development of aviation in Canada and the possibility of the Dominion realizing a transcontinental air mail service, linking Vancouver and Halifax, by 1931, were heralded here by Major Gen. J. H. MacBrien, of Ottawa, president of the Aviation League of Canada.

Completing 1,500 miles of a solo flight from Ottawa, the famed Canadian flying "ace" piloted his little Gypsy Moth to a perfect landing at Stevenson Aerodrome, Winnipeg. General MacBrien is en route to the Pacific coast.

"Progress in Canadian aviation has been satisfactory," said Gen. MacBrien, "and a rapid development is taking place. Commercial aviation is growing steadily in Canada. New mail routes are being opened all the time, new flying clubs are being formed, and generally the situation is very promising."

Referring to the establishment of a transcontinental airway, Gen. MacBrien stressed the importance of persons going into regulation and pointed out that links were already started in both the east and west.

"Completion of the service will witness flyers being supplied from northern provincial districts such as Hudson Bay, Peace River, Northern Ontario and Quebec," he said, "and eventually the Dominion will boast of one of the most extensive and enterprising services in the world."

Two Killed By Explosion

Metal and Tank Burn 200 Feet Into Air

Trail, B.C.—Two men were killed almost instantly and a third injured when an acetylene gas tank exploded in the acetylene burner shop of the Consolidated Reduction plant here.

The explosion threw metal 200 feet into the air. The tank itself rose to that height and came crashing back over the roof of the gate house, doing damage there.

Ontario Election Predicted

Toronto.—The Mail and Empire (Conservative) says:

"A Conservative high in the official circles of his party in Toronto confidently predicted to the Mail and Empire that Premier Ferguson would go to the country early in November. The date would be in the first half of the month, because, he said, there was a strong feeling among the leaders, including the premier, against approaching winter campaigning."

Edmonton Judge Holds Court At Aklavik

Travels 2,000 Miles To Teach Eskimo He Broke The Law

Aklavik, N.W.T.—A verdict of guilty of manslaughter was returned in the case of Oshchina Bakov, by a jury at Aklavik, recently, before His Honor Judge Dubois, of Edmonton. The trial was held at Aklavik, in the Northwest Territories, with judge and jury.

Oshchina, the Bathurst Inlet Eskimo, was found guilty of murdering Oksak, another Eskimo, in the fall of 1927.

The jury considered for two hours and brought in a verdict of manslaughter, through their foreman, Dr. A. Trussell. Oshchina was sentenced to one year's imprisonment at Herschel Island.

This is the end of this year's judicial party's journey to the north to bring to the Eskimos two thousand miles from Edmonton that British rule and justice for which the British empire has fought through centuries.

Replies To Critics

President Hoover Urges Justified Postponing Work On Cruisers

Washington.—The agreement between the United States and Great Britain to postpone the building of the strength of their navies is held out by President Hoover as an answer to critics of his decision to postpone work on the three cruisers laid down in navy yards next fall.

Quoting our naval authorities as regarding the postponement of the building of the three cruisers as a "complete deflection of the United States contingency," the president has taken occasion to set forth the importance he attaches to the agreement in a letter replying to criticisms of cruiser postponement action. By Paul V. McNutt, national commander of the American Legion.

Rain Mars Opening Of Scout Gathering

Dampness Drenched Thousands Who Attended Rally In England

Arns Park, England.—Drenching rain pelted the international gathering of 50,000 boys of the Boy Scouts' World Jamboree as the gates opened to civilians flocking to witness the formal opening of the great rally by the Duke of Connaught. The Scout association to the dampness was to break out in raincoats and slickers of all kinds and to carry on with theirs.

The gathering of the troops of boys from 42 nations on the parade ground for the rally, however, developed into a very damp job.

Standing Behind Treaty

Prince Rupert.—The British Columbia Government stands firmly behind the Fraser River sockeye salmon treaty between the Dominion and United States, and strongly decries in passage at the next session of the Canadian Parliament, Hon. S. L. Love, provincial commissioner of fisheries, declared in an address to the Canadian Fisheries Association here.

CELEBRATE DOMINION DAY IN JAPAN

The photograph here shows a scene at the new Canadian Legation in Tokio, Japan, on last Dominion Day, when celebrations, its first public function, were conducted in the grounds and the Canadian flag was officially raised for the first time in the Orient.

HEADS ONTARIO MASONS

C. H. McKeown, of Toronto, chairman of the Ontario Railway Board, who has been elected grand juror of the Masonic Grand Lodge of Canada in the province of Ontario.

Making Secret Trip In Moth Airplane

Believe Machine Going North For Mineral Exploration Purposes

The Pax, Man.—A secret trip into the Northwest in a moth plane is underway with Capt. W. N. Sherlock of Dominion Explorers' aerial staff at the controls. The flyer hopped off from here for Lac La Ponge, in northern Saskatchewan. While the aviator refused to discuss his trip, it is stated in mining circles that the machine will be taken into the north for mineral exploration purposes.

If successful, the venture will likely set a new Canadian record for light planes of the moth type. Most of the country over which the machine is flying is remote from habitation and a forced landing enroute would place the pilot in grave danger.

Canada At League Assembly

Hon. W. D. Eider May Represent Dominion At Coming Meeting

Ottawa.—Canada will probably be represented at the coming meeting of the Assembly of the League of Nations by Hon. R. Dandurand, Hon. W. D. Eider, Minister of National Revenue, and another member of the Dominion Government. The selection of Canada's representatives will be made definitely at the next meeting of the Cabinet, it is understood.

Mr. Dandurand, who is Canada's representative on the Council of the League, will certainly go to the Assembly and it is understood that Mr. Eider will be one of his companions. Just who else will go is not known.

Progress Is Satisfactory

London, Eng.—Recent satisfactory progress toward an Anglo-American agreement on naval limitation, has raised the belief in well-informed circles here that participation of other naval powers in the conversations may not be delayed as long as previously was anticipated.

Immigration To Prairies Not To Be Encouraged At The Present Time

Cotton Strike Still Far From Settlement

Powerful Weaving Branch Refuses To Consider Wage Reduction

Manchester, Eng.—Lancashire's cotton mill stoppage continues with prospects sadder than ever for an immediate settlement and return to work of its striking operatives.

The employers professed still to be ready to negotiate for a solution of the dispute and the card room workers and spinners seem prepared to negotiate with them, but the powerful weaving branch was determined to resist any settlement in opposition to the proposed wage reductions.

Meanwhile a section of the British press commented on the serious loss to British industry growing out of the stoppage as a consequence of the opportunity it gave rivals to seize the national trade.

Germany, France and Japan were reported in these quarters as optimistic over the opportunities presented. The latter declared northern France would reap a golden harvest, orders which ordinarily would go to Lancashire, to Lille, Roubaix and Tourcoing. The paper said the French textile mills were working at top speed.

The Express printed an article by an unnamed authority, attacking the obsolete organization of the cotton industry, which the writer said, is still bound by the methods of 60 years ago, absurd under present conditions.

Will Check Liquor Runners

Ottawa To Ascertain Whether Canadians Engage In Traffic

Ottawa.—A check-up is to be made of the liquor running activities along the Canadian border for the department of national revenue to ascertain just what number, if any, engaged in the traffic are Canadians. This will be done before the government to reach a conclusion whether there is a sufficient number to make it worth while introducing legislation in the next session of parliament to prevent citizens of this country from obtaining clearances for liquor going to the United States.

The recent statement of Hon. W. D. Eider, minister of national revenue, announced that if there was any considerable number, legislation to put them out of the business would be introduced.

To Locate Beacon Station

Dept. To Be Established For Airplane Pilots Near Brandon

Brandon, Man.—Federal authorities have decided to locate a beacon station for the guidance of airplane pilots one and one-half miles east of Brandon, in the town of D. McLean, of C. Taylor, of Regina, members of the federal aviation board, concluded the preliminary arrangements here this week. Two men are to be stationed at the depot, one for day and the other for night duty. It is understood that the closest beacon station to the west will be Broadview.

Would Have Britain Sink Some Ships To Reach Parity With U. S.

Washington.—Great Britain was cited today in a statement issued by Chairman Borah, of the Senate Foreign Relations Committee, to sink some of her ships as a means of reaching a parity with the United States.

Borah said England has 59 modern cruisers while the United States has eighteen built or building.

"If Great Britain will follow our example at the Washington conference," he said, "and sink some of her ships and thus come to parity, it will not only save the taxpayer but reduce the incentive to war for huge armaments are always an incentive to war, parity or no parity."

"But if we have to build up to parity, it vastly increases the burden of the taxpayer and augments the incentive to war."

The Idaho senator was a luncheon

Ottawa.—Immigration to the prairies will not be encouraged at the present time. Back in Ottawa following a one month tour of the west, Hon. Robert Forke, minister of immigration and colonization in the Dominion Government, stated that the western provinces are not now seeking a large immigration.

Ancient at all times to keep in close touch with the provincial governments, the department of immigration will consult with Winnipeg, Regina, and Edmonton from time to time. Mr. Forke indicated, however, that his prairie tour has effected no alteration in the Dominion's immigration policy.

The light crop in Western Canada, resultant from torrid weather and lack of rain, has given rise to the prairie's attitude toward an influx of immigrants. While the situation is serious, in Mr. Forke's opinion, it is not disastrous.

There will be work at good wages for willing hands when the harvest comes," says Mr. Forke. He considers that in Saskatchewan and Alberta the decreased crop will mean the slowing up of improvements that have been going on, but that the check will be only temporary. A suggestion that Manitoba's crop will be the largest in many years is discounted by the minister, though he believes that Manitoba has been less affected than his sister provinces.

Individual hardship will undoubtedly result in some cases," mentioned Mr. Forke, "but the west is too well established for the short crop to be anything but a temporary check. Widespread preparations for next year's crop indicate that many farmers are ready to accept their misfortune and to recoup their losses with another harvest."

The situation regarding soldier settlers and settlers under the 3,600 family scheme was one of the national discussions with western government officials. While those settlers have difficulties to meet and overcome, says Mr. Forke, upon the whole they are doing very well.

"Every effort will be made to relieve any causes of discontent that can be remedied," mentioned the minister. He conceded that the present situation will be discouraging to those immigrants who are not established, and admitted that their circumstances will have to be considered in the future. He did not mention immigrants was outlined, despite the mention of willingness to aid needy cases in any possible way.

The fact that the prairie provinces, at the recent conference in Winnipeg, made known the harvesters from the east had been asked were not required this year is an indication of the effort to do those thrown out of employment by the delay of improvement in the light crop mentioned by Mr. Forke.

Unemployed in western cities will find work on the harvest fields when crop time comes.

Patrols and work gangs maintain nearly 45,000 miles of roads in Canada in repair at an annual cost of over \$16,000,000.

Would Have Britain Sink Some Ships To Reach Parity With U. S.

Washington.—Great Britain was cited today in a statement issued by Chairman Borah, of the Senate Foreign Relations Committee, to sink some of her ships as a means of reaching a parity with the United States.

Borah said England has 59 modern cruisers while the United States has eighteen built or building.

"If Great Britain will follow our example at the Washington conference," he said, "and sink some of her ships and thus come to parity, it will not only save the taxpayer but reduce the incentive to war for huge armaments are always an incentive to war, parity or no parity."

"But if we have to build up to parity, it vastly increases the burden of the taxpayer and augments the incentive to war."

Protected Against Fruit Pests

Prohibits Imports From Infected Area of Florida

An order-in-council absolutely prohibits the importation into Canada of non-canned fruits or other plant products from the sections of the State of Florida, where infestations of the Mediterranean Fruit Fly have been found. Shipments of these products from all other parts of Florida entering Canada must be accompanied by a certificate of inspection signed by a duly authorized official of the United States Federal Department of Agriculture. This certificate must state that the contents of the shipment were grown in a non-infested area.

The Mediterranean Fruit Fly is an important enemy of citrus fruits, and attacks other fruit crops and vegetables. The Dominion Entomologist of the Federal Department of Agriculture, following the situation closely. The infestation in Florida during the past few months have caused more anxiety than any other insect, and already some amounting to nearly \$4,000,000, have been sent aside for control purposes. All shipments of plants and plant products entering Canada from Florida are being closely watched by inspectors under the Destructive Insect and Pest Act.

England To Import Hay

But Saskatchewan Farmers May Have None To Sell

Saskatchewan's 1929 hay crop will find a ready market in England and Wales, according to intimations received by W. W. Waldron, market commissioner of the provincial government. Quoting from an article by Harrison Watson, based upon the hay crop outlook in England and Ireland, it was pointed out that poor crops had been realized there in 1927 and 1928, and there was an estimated shortage for 1929.

The article pointed out that the deficiency in the hay crop was made more serious by the fact that the new crop of hay had been entirely utilized. However, poor crops were reported for Saskatchewan point to the fact that the local hay crop will be required at home.

The first cut in the old country gave the farmers just half a crop, according to the report, and in the second crop it is estimated but 25 per cent. of an average crop will be realized. The report states that it is certain that the United Kingdom will have to import hay.

According to present conditions it appears that the Saskatchewan farmers will be unable to take advantage of this ready market for their produce.

The British Empire

"The British Empire reports an effort to unite for a common purpose races which are scattered all over the world, whose peoples are different in color, in color and in traditions," Premier T. B. Harvin, of New South Wales said in addressing the Canadian Club at Vancouver. "It is an effort to combine two apparently inconsistent ideas," continued Harvin. "The idea of perfect individual liberty united to a single Empire purpose for the good of the Empire and the world."

Will Attempt To Solve Bullion

An attempt will be made to solve the \$500,000 in bullion sunk off Brest, France, in the liner Egypt company which sailed the Belgian steamship "Elizabeth," also a war victim, will have charge. The latest German diving outfit, which dives under to work for, several hours at 200 fathoms, will be used.

One flower set in a draft will soon wilt.

"It is he who is to be greeted since I borrowed \$50 from him," — Moustique, Charlot.

Alligators Alarm Bathers

Two Five Foot Saunians At Large In The Ottawa River

Luna Park, the "Little Sunnyside" of Ottawa, has a new threat. Bathing has been called off an account of alligators.

The park imported 26 alligators from the swamps of Florida and while they were being unloaded at the aquarium in the park, two five-foot saunians got away and slipped into the Ottawa River.

Swains who stroll by the river in the moonlight have been warned not to ask the girl friend to sit on a log and watch the moon. The log may open up and chew off a leg.

When the alligators arrived at the park they were all murdered. The park attendants had never before been called to act as valet to an alligator and so transferred them to the tank by grabbing a tail and swinging them out.

One five foot alligator about 30 years old got some of his trick teeth to work and chewed off his muzzle. Then he chewed the muzzle of a pig and ended up by chewing a leg off another.

Joe Charlebois who was conducting the personally conducted trip of the alligators had switched five into the tank and was returning for the sixth when he found two of them free and in open-faced condition. He backed off. His instructions had been to grab them by the other end but he couldn't reach it.

Joe went into executive session with himself. The alligators were not bilingual but they swore at him in the alligator language. They hissed and huffed. Joe backed up. The alligators made for the wide open spaces of the Ottawa river which was about a mile wide at this point, and disappeared in the water.

Farmer Knows No Hours

Has To Stop On Job Until Work Is Finished

In his chapter on "The farmer's independent existence," published recently in the "Dairymen's League News," the Rev. A. Ritchie Low says that the farmer knows no hours. "Farming provides a man with a steady job," he says. "He is not a man who is right or wrong. But read two sentences further on: 'He is master of his own time. He determines when he shall get up and what time he shall go to bed.' The dekhend on the farm, the designer of hosiery buns, have jobs that bring considerable leisure. But if the farmer quits before the cows are milked and the stock fed, he is—well, no farmer."

The glowing peasant cited uncannily overlooks a new and more elastic system of accounting that has been recently offered to the farmer's life into one of affluence. Suppose, for example, that at the close of the year a farmer finds that his income has been \$5,000 and his business expenses \$3,000. He may be completely cast down to discover that he has lost \$2,000 in the year. According to the latest department of scientific management, however, it is now recommended that he add to his income an arbitrary figure for aesthetic satisfaction. Add \$5,000 worth of aesthetic satisfaction to \$5,000 income, and the income is \$10,000, showing a net profit of \$8,000. That would make farming seem worth while.

Has Best Of Precedents

The minister who in seeking a larger attendance at his church during the spring and summer season, promised that his sermons would be so short that the entire morning service would last only one hour, may have achieved some of the most conservative members of his parish. But he has the best of precedents. The "Sermon on the Mount" can be read easily in much less than half an hour.

Adds To Population

Who is not to be the largest household ever to move into Canada, arrived at Quebec in the person of 75 people by the name of Amster, all related. The oldest member is 80 years of age and the youngest three. Twelve distinct families make up the group which comes from Switzerland. All were bound for Western Canada.

Low Bus Fares In China

Bus owners of Harbin, China, have adopted modern methods by combining, and the association now has 110 vehicles and pays the city an annual tax of more than \$10,000. The fares have been fixed at from two to five cents, according to the distance, within city limits figure for

Eighty-four and Eight

Shakespeare To The Contrary It Sometimes Means a Lot

The citizens of the ancient town of Trenchburg, in Norway, are up in arms against a proposal to change the name of the place to Nidaros, under which it was known during the Middle Ages. Ninety per cent. of the populace is opposed to the proposed substitution, and the municipal council has sent a protest to the National Assembly voicing their attitude and threatening to refuse to abide by the change, if it is made over their protest.

The old problem is again involved: "What's in a name?" Well, there is a good deal more in a name, if we may believe some expert witnesses, than Shakespeare thought. While it is true that a rose by any other name would smell as sweet, it is also indubitably correct that if roses were advertised as onions at \$3 a dozen, there would be a strikingly limited market for them.

Wm. Church, 84 years of age and a friend in David Wright, 8 years old, on their trip on Canadian Pacific steamer "Metia" from Montreal to Glasgow. Mr. Church lives in Essex, Ont., and was on a visit to his son in England. David Wright travelled alone from Alberta to Scotland and was tagged by the Canadian Pacific Railway, in whose cars he was placed, to his destination. It was hard to say which of the two boys enjoyed the voyage the most.

Tributes To Doctors

Medical Fraternity Making Sacrifices For The Benefit Of Mankind

Probably no professional men work harder or longer to acquire new knowledge than physicians. They are always at school. They are always exchanging discoveries, if not at conventions then through professional journals. The happy "bit" of one doctor becomes at once public property, available to the hand of every colleague. They do not patent their inventions and mint the sufferings of mankind into cash. They are sentinels always on the watch and always eager to sound the alarm when a foe approaches, or when an enemy can be beaten back. — Montreal Star.

More Information Needed

A sorrowful office of works has advised citizens how to catch a poll which winged away from St. James' Park. "It will be quite helpless if seized by the bill with one arm, while the other is placed around the body," says the notice. Police are wondering how to seize the bill of a pelican that refuses to be tempted from its nest.

The man with the pull is mightier than the man who gets pulled.

THE CELEBRATED BAD BABY

No. 15, The Bad Baby—130 yards, Par. 3.

There is no place to go here except the green. Everywhere else spills trouble with a capital "T." While it is the shortest hole on the Jasper Park Lodge Golf Course, it is one of the hardest, and many a hope for high Canada Amateur Championships. The hole will be played August 24, and the Silver Totem Pole Tournament, September 7-11. The tee, fairway and green are all shown in the upper photograph and below is a sketch to scale, showing the hole in detail.

What's In A Name

Shakespeare To The Contrary It Sometimes Means a Lot

The citizens of the ancient town of Trenchburg, in Norway, are up in arms against a proposal to change the name of the place to Nidaros, under which it was known during the Middle Ages. Ninety per cent. of the populace is opposed to the proposed substitution, and the municipal council has sent a protest to the National Assembly voicing their attitude and threatening to refuse to abide by the change, if it is made over their protest.

The old problem is again involved: "What's in a name?" Well, there is a good deal more in a name, if we may believe some expert witnesses, than Shakespeare thought. While it is true that a rose by any other name would smell as sweet, it is also indubitably correct that if roses were advertised as onions at \$3 a dozen, there would be a strikingly limited market for them.

It seems to find a well-nigh impossible to contemplate the publication of a novel from the other side unless they change the name. Their argument is a case that intrigues the public imagination or attracts the public curiosity is much more likely to sell a book than anything else. They might be right.

In Canada we have instances of the names having been changed, and the change has not seemed to have done any harm. But it should surely be left to the particular community involved to decide whether they shall continue to be known as citizens of Rosetown or Onville. They are the people who will be affected by any change, who will inevitably be left to the inconvenience through the mails and in other ways, so considerable a price. It is inconceivable that a whole nation should be interested in the change of one town's name. — Montreal Star.

Name Honors After Fliers

Canada commemorated and commemorated the names of the first two men to accomplish a non-stop flight across the Atlantic, when Brig.-Gen. A. H. Bell, Officer Commanding Military Bell, No. 2, Ottawa, christened two Royal Canadian Air Force "skinner" pursuit planes at Camp Borden, naming them the Sir John A. Macdonald and the Sir Arthur Whitten Brown.

New Canning Plant

The new dehydrating and canning plant of Bulman's Limited, is nearing completion at Vernon, B.C. It is ultra modern in the treatment of fruits and vegetables and will have a maximum capacity of from 35 to 40 tons per day. One hundred and fifty employees will be needed when the new plant begins operation, probably early in August.

Leather dressing was one of the most important trades among the ancient Egyptians, and at Thebes, in the days of Egypt's glory, a special quarter of the city was set apart for the tanners.

Fleshy Annual Pastures

Found Very Satisfactory For Sheep, Swine and Cattle

The principal use of fleshy annual pastures in Canada, such as rape, kale and cabbage, as yet, is as a pasture. In this capacity they have been found quite satisfactory for sheep, swine and cattle principally young cattle or fattening steers. Grown in poultry runs, these crops also constitute a satisfactory free-range food for most kinds of poultry.

It is claimed that animals pastured on rape require a greater amount of salt than usual, and that this should be freely supplied.

In the instance of cattle and sheep there appears to be some danger of bloating, unless precaution is exercised to prevent this. Growers of these crops claim that if the animals are not allowed to begin when hungry, especially when the plants are wet with dew or rain or frost, that bloating may be entirely avoided.

One exception to eating these crops little danger of bloating exists. According to the pamphlet No. 73 "Fleshy Annual Pastures in Canada," available from the Publications Branch of the Department of Agriculture, at Ottawa, instead of being utilized as a pasture the fleshy annuals under consideration may be cut green and fed directly to the same types of animals. Dairy cows may also be included in this category for soiling purposes, but good judgment must be exercised as to the time of feeding if undesirable odors are not to affect the quality of the milk.

One of the three crops are also greatly relished by poultry and could be much more widely fed in the poultry-pasture.

Because of the fact that the varieties of both rape and kale they be planted probably quite late in the spring, they are frequently recommended as aids in eradicating weeds. The land to be cleared may be ploughed early and cultivated until the latter part of June which in itself results in the destruction of the numbers of weeds. Either rape or kale may then be sown, and as they soon cover the ground, further weeds are not likely to be largely prevented by shading.

Body Lice In Fowl

Readily Controlled By The Use Of Powder Which May Be Easily Obtained

Body lice are very readily controlled by the use of lice powders of which there are many on the market and which are dusted into the feathers and underneath the wings, or mercantile ointment, commonly known as blue ointment, is very convenient to use. A piece about the size of a small pea is rubbed beneath the wings and underneath the vent. Eccles to your local druggist what you need is the ointment, and he will make it the proper strength. Blue ointment should never be used on setting hens as it will destroy the germs in the eggs. Mr. George Robertson, in Circular No. 59 on "How to Kill a Henhouse or Mite," available at the Publications Branch, Department of Agriculture, at Ottawa, says, of all the many varieties of vermin that infest fowl, Red Mites are the most troublesome. Unlike the ordinary hen lice, they are not, as a rule, found on the fowl, neither are they killed by dusting, as the ordinary body lice is. These pests breed very rapidly, especially during the hot weather, usually in cracks containing filth or in dirty nesting material. They are not red in colour as is popularly supposed, but grey; it is only after they have come into contact with the fowl and have become filled with blood that they appear red. The young mites are white and have only six legs, but after they have shed their skins, they have eight legs. They are able to crawl and reproduce without the aid of an animal food, the first food of the young probably being filth or decayed wood. They thrive best in dark, dirty houses, and are often found to exist in houses the following season after the fowl have been removed. The circular also contains particulars as to the control of mites and the best disinfectants to use.

Nothing To Show

Ebberly Clerk: "I don't like this new fashion of the young men going without hats." Friend: "Why not?" Clerk: "In the days of long ago, when the chief wanted somebody to be in the office, one would say: 'He must be about—there is his hat; but now there is nothing to show.'"

New Settlers Need Sound Education

Practical Subjects Should Be Part Of School Curriculum

"A sound education is the thing that matters for the 'leading migrant,'" is the dominant note of the report read at the meeting of the British Association for the Advancement of Science by a committee that has been considering the educational training in secondary schools for overseas life. The chairman of the committee is Sir John Russell, of the Rothamsted Experimental Station at Harpenden, England.

"That no education sound that does not provide some handwork, especially for those who can learn better through practical methods, the report said.

In concluding its report the committee stated the chief conclusions to which their enquiry had led them, as follows:

"When properly worked, the introduction of studies on soil, the growing of plants, the management and utilization of the soil and the broad outlines of agriculture, besides giving boys and girls the kind of practical training necessary to equip them not only for life overseas but for life generally, has been found to raise the standard of attainment in other subjects."

"Examinations for the school certificate should be modified so as to give due credit to practical training."

"There is need for a continual exploration of the whole subject of school curricula with regard to the incorporation of practical work suitable for different types of school—urban as well as country."

Water Glass As An Egg Preserver

Five Per Cent. Solution Has Given The Best Results

The well known preservative water-glass, chemically known as silicate of soda, is readily obtainable at druggists and grocers, being sold in liquid and solid form. It has been extensively experimented with, using solutions varying in strength from 2 to 10 per cent. In 2 pounds of water 10 grains of water; in our investigation a 5 per cent. solution has given better results than stronger solutions. It is readily soluble and no special directions for preparing the preservative solution are necessary.

Experience from "water-glass" have on the whole been very fairly satisfactory, but as already stated we consider time-water the superior preservative of eggs on breaking, showing less discoloration of the "whites" with more globular yolks.

Certainly, essentially necessary to good results are that perfectly fresh eggs should be used. That the eggs throughout the whole period of preservation should be kept completely immersed. Do not take them out of the solution until required for use. That the eggs should be stored in cool places. A temperature of 40 degrees to 45 degrees Fahrenheit, undoubtedly material assists towards obtaining good results. It is well known in arresting that "stale" favour so characteristic of packed eggs.

Nothing To Show

Ebberly Clerk: "I don't like this new fashion of the young men going without hats." Friend: "Why not?" Clerk: "In the days of long ago, when the chief wanted somebody to be in the office, one would say: 'He must be about—there is his hat; but now there is nothing to show.'"

Telegraph Service For North

The tentacles of civilization are reaching into the northland. The department of public works has called for tenders for the clearing of a right-of-way for a telegraph line from inland Hill to the Arctic Circle. These places are in the far north of Saskatchewan, miles beyond ordinary civilization.

"And I came here because they said the water bunched rheumatism," Gutierrez, Madrid.

Lucky Tail Driver

Andy Williams, tail driver at Pictou, Ontario, was paid \$100 by an American tourist for a 50 cent ride. The man and two friends arrived in Pictou on a big sack. They wanted to find the post office. The fare was 50 cents. "He handed me a \$100 bill," Williams relates, "I could not change that. 'Oh, that's all right,' he said. 'Take it and take a holiday.'"

The sale of inflammable X-ray films has been prohibited in New York state.

Laudable Movement Has For Its Object the Interpretation Of British and Canadian Music

Fashion has its place in music as well as other things, and fashion has had much to do with the neglect of British music. Until the beginning of the seventeenth century, English music was celebrated throughout Europe. John Dunstable was the greatest composer of the fifteenth century, while in Elizabeth's day John Dowland and John Bull were musicians coveted by foreign courts. Then came a time of Italian music followed by another tide from France. The titanic genius of Handel favoured by Hanoverian kings made England musically a German province for at least a hundred years, and as Germany and Austria produced a marvelous succession of composers, it was difficult, indeed, for the British musician to raise his head. Then came a deluge of Slav music with a renaissance of French influence to swamp any British renaissance.

With the twentieth century, however, the situation has changed. The English, medieval, and church music of the Elizabethan period was unearthed and made known through the enterprise of scholars such as Dr. E. H. Fellowes. The immensely rich field of British folk music was at the same time coming to be realized and the field the British musician found an inspiration which has resulted in compositions of new vitality and distinction. Marjory Kennedy Fraser, for instance, in her arrangements of the "Songs of the Hebrides," has done work of intense appeal, while in compositions based on English folk-song the name of R. Vaughan Williams is internationally known. Indeed, the firmament of modern music is dotted with British stars, whose names perhaps have sometimes a Continental ring, but whose birth record is undisputedly English—such names as Elgar, Stanford, Patti, Delius, Holst, Cyril Scott, Arnold Bax and Dame Ethel Smyth.

Musicians in order to live must be performed, and therein lies one of the handicaps of the British composer. So many players and singers have been schooled on purely Continental European classics that concert and operatic audiences do not much opportunity of hearing anything else. New York is the mecca of the European concert and operatic artist, and Canada gets its quota of New York artists tour. This gives us a great deal of good music, but mostly music of Continental Europe, the percentage of British music being almost negligible.

It is, therefore, in the national interest that Canadians should have more opportunity of hearing the music which is their legitimate heritage, and with that end in view the music department of the Canadian Pacific Railway has organized a series of concert tours with artists of distinction who will interpret British and Canadian music to Canadian audiences. For practical considerations, Canadian Pacific hotels in six large cities have been chosen for this series.

The scheme has the warm approval of leaders in the Canadian musical world, such as Dr. Ernest MacMillan, Principal of the Toronto Conservatory of Music.

Canada has so recently emerged into nationhood that any large output of distinctively Canadian music could hardly be expected. There is, however, a rich store of folk songs, particularly in the Province of Quebec, retained by tradition from early settlers of New France, and so adapted to Canadian life as work-songs that they have assumed a colour and quality of their own. There are, too, a number of young Canadian composers whose work is obtaining recognition by international publishers. Among the inter-

preters of music, Canadian singers and players are to be found among the foremost in London, Eng., Paris and New York, while the Canadian ensemble known as the Hart House Quartette, is second to none.

The first recital of the series will be given by Marjory Kennedy Fraser, the gifted woman who sings in beautiful fashion the lovely songs of the Hebrides, which she has given to a musical world. She will be accompanied by her sister, Margaret Kennedy, a well-known teacher, who was given the honorary degree of A.B.A.M. for her services as lecturer on harmony at the Royal Academy.

The second concert is that of Stanley Maxfield, brilliant tenor in the trans-Canada tour will be given at Vancouver, Sept. 16; Calgary, the Hotel Palliser, Sept. 21; Regina, the Hotel Saskatchewan, Sept. 22; Winnipeg, the Royal Alexandra, Sept. 26, and the Royal York at Toronto, Sept. 30.

Marjory Kennedy Fraser and her sister will start their tour at the Empress Hotel at Victoria, September 12, after the Banff Scottish Festival at which she will be one of the principal artists. Her other concerts in the trans-Canada tour will be given at Vancouver, Sept. 16; Calgary, the Hotel Palliser, Sept. 21; Regina, the Hotel Saskatchewan, Sept. 22; Winnipeg, the Royal Alexandra, Sept. 26, and the Royal York at Toronto, Sept. 30.

Value Of Sleep

Possible To Live Longer Without Food Than Without Sleep

Science has evolved drugs that will put one to sleep, but just what it is that brings natural sleep is as great a mystery today as it was to the cave-man who curled up on his rock mattress with his flowing beard spread over his face for a quilt. It is a commentary on human nature that we are more particular about our food than we are about regular hours of sleep, yet it is a fact, definitely established, that it is possible to live much longer without food than without the benign embrace of Morpheus.

—Hamilton Spectator.

London's tube stations now have three-hour escalators.

It is estimated that 5 per cent. of men are color blind.

Canada's Fruit and Flower Production

Value During Year Ending May, 1928, Was Well Over Two Millions

According to the official figures collected by the Fruit Branch of the Dominion Department of Agriculture, the total value of Canada's fruit products of Canada for the last calendar year, amounted to \$10,824,333, comparing favourably with the 1927 total of \$17,605,995. The respective figures for the five provinces listed were reported as follows: Nova Scotia, \$3,228,050 and \$2,875,565; New Brunswick, \$190,600 and \$201,300; Quebec, \$484,400 and \$729,520; Ontario, \$7,620,121 and \$6,619,930; British Columbia, \$7,937,102 and \$7,116,675. Although British Columbia is usually regarded as the banner fruit province of the Dominion, the report shows that only slightly over \$300,000 separated the Pacific Coast province from the Great Lakes province, the latter contributing to the general agricultural wealth of Ontario.

Taking commercial apples alone, the total production for the Dominion is finally estimated at 3,325,970 barrels, valued at \$1,120,947, comparing with 2,610,600 barrels, valued at \$1,041,045, the finally revised 1927 estimate. The average value per barrel was \$3.49 in 1928, and \$3.70 in 1927. Total nursery fruit stock sales for the year ending May 31, 1928, are valued at \$251,737, against \$172,661 for the corresponding year 1927-28.

The total value of the floricultural and decorative plant production of Canada during the year ended May 31, 1928, as represented by these statistics is given as \$2,650,130, comprising \$491,963 for outdoor roses, \$54,482 for other outdoor trees, etc., \$342,585 for specific indoor plants, \$19,523 for other indoor plants, \$73,415 for flowering bulbs, and \$1,051,160 for cut flowers. Clearly, therefore, the cut flower industry exceeds all the other categories together, both in volume and value. The value of the cut flowers sold represented, in fact, 63 per cent. of the total.

Alberta Pool Interim Payment

One dollar a bushel will be the interim payment on wheat for grain delivered to the 1929-30 crop, according to an announcement made at the Alberta Wheat Pool offices in Calgary. Last fall when a bad slump in wheat prices occurred the initial payment was lowered from \$1 to 80 cents, but the previous interim payment will be issued this fall.

New York City now has more than a million school children.

A word to the wise should be superfluous.

CONSIDERED JAIL THE BETTER PLACE

Leonard Fraser, 65 who ran away from the poors, after his first night there, to the Toronto jail, where he asked to be committed because he considered the jail the better place.

Plenty Of Employment

New High Rate Of Activity Is Shown Throughout Canada

Employment in Canada has reached a new high rate of activity for all time. During the month of June, 43,109 workers were added, bringing the total on July 1, to 1,098,706. Figures were compiled by the Dominion Bureau of Statistics, from 6,819 firms.

Every month this year has shown larger figures than last year. Since April the trend of employment has taken a sharp upward turn. On July 1, all previous records had been broken and the movement still continues upward.

The Bride—Are you sure your marriage service is just as valid as any other?

The Justice of the Peace—More so. Remember, you promised to obey this man, and if you don't I can fine you for contempt of court.

Western Coal Operators Are Interested In Railway Board Hearing On Freight Rates

Western coal operators, according to their head, W. W. McEln, are wholeheartedly behind the joint action of the provinces of Alberta and Ontario in requesting a subject Railway Board hearing on the matter of freight rates.

Formal application for this hearing has just been made by J. Earl Lawson, of Toronto, counsel for the two provinces.

"Considerable quantities of domestic fuel were shipped to Ontario during 1928," Mr. McEln says in explaining the situation, "under the Order-in-Council providing a temporary freight rate of \$6.75 per ton. The Federal Government undertook to secure the railways against loss in hauling the coal and the Order-in-Council authorized the Board of Railway Commissioners to name a freight rate."

"Now, as we understand it, the railways are applying to the Board for definite payment per ton on the coal hauled last year. As the coal operators view the matter, the chief reason for carrying on these experiments in coal transportation is in order to ascertain over a period of years, exactly what it does cost to bring coal into Ontario from the west. The Order-in-Council, as we read it, states this in the plainest terms."

"The statements which have been submitted to the Board," Mr. McEln continued, "apparently take a different view of the matter and disregard the actual or out-of-pocket cost of hauling the fuel. Ontario and Alberta have made a submission to the Board, to this effect, asking for a hearing on the question and requesting that the two roads furnish the Commissioners with this further information."

Mr. McEln pointed out that the stand taken, both before the Senate Committee in 1923, and the Committee of Mines and Minerals of the House of Commons, was that a distinctively Canadian fuel policy, which would tend to provide for the needs of Canadian consumers from the output of Canadian mines, would be very much in the national interest. Alberta has sufficient coal resources to provide for the Dominion's needs for eighteen centuries. Ontario pays into the pockets of American operators and railways approximately thirty millions annually as a result of her purchases of anthracite in this foreign market. It would be greatly in

the national interest to keep this money in Canada, and the problem of doing so boils down to one of transportation.

"It has been taken for granted," Mr. McEln stated, "that the great economic importance of a national fuel policy put the matter on a different plane from any ordinary discussion of freight rates and that some scheme might properly be worked out under which fixed charges, which the railways must meet in any case, and which are on just the same, whether fuel is hauled or whether it is not, would not be assessed against the coal movement. Particularly so, since the coal would be carried during the off-peak grain season, and in cars which would otherwise be lying idle on the sidings."

"Naturally, any such rate must also be fair to the railways," Mr. McEln said, "but the first necessity preliminary to the consideration of a permanent arrangement is definite knowledge of what it does actually cost the two great transcontinental roads to bring the coal east. That is what the two provinces are asking the Board of Railway Commissioners, at Ottawa, to find out, and an investigation, with that end in view, was requested by the Order-in-Council of last year."

"When Mr. E. P. Mallory, the expert of the National lines, appeared before the Committee in 1923," Mr. McEln declared, "he gave \$8.91 per ton, as the out-of-pocket cost, and subsequently a telegram to the Committee from Sir Henry Thornton, made the offer to carry the coal at \$9 per ton. At that time, however, the figures were higher than they are today, as the reports of the railways show, so that it is logical to suppose that the cost now is less than it was at the time the suggestion of a \$9 rate was made."

"In September 1927, two reports on the out-of-pocket cost were made by the Board of Railway Commissioners following an official inquiry into costs. The majority report found that the cost of transportation to the ports was \$7.22 per ton, while the minority report gave a figure of \$6.50 per ton. The operating costs of last year these calculations were based were also higher than those of the present time."

"But we are informed," Mr. McEln concluded, "that, on the basis of the 1928 coal movement, one statement gives \$15.02 per ton as the amount claimed or, in other words, the difference between \$6.75 and \$15.03 as the sum per ton which the government should pay."

"This is not only much higher than either the \$7.22 or \$6.50 Railway Board out-of-pocket figures and well above the \$9 offered in 1923, but it is even \$3 per ton higher than the average rate for all commodities for the distance which the coal was moved."

Swedes Are Original

The Swedes have made great advances recently. Unlike other nations they are not still following Anglo-Saxons. They are developing a civilization of their own. A Swede controls the world market in radium. Another Swede is one of the two chief radium experts in the world, and still another is recognized as one of the greatest modern architects.

TO TOUR CANADA

The British artists who will tour Canada during the coming fall and winter under the auspices of the Canadian Pacific Railway. The object of this series is to show Canadians the vast amount of splendid British music available and familiar in the Old Land. (1) Florence Hood, violinist of Montreal; (2) Marjory Fraser, famous collector and interpreter of Hebridean music; (3) Mary Frances James, young dramatic soprano; (4) Stanley Maxfield, English tenor, now resident in Montreal; (5) John Glas, long, English exponent of Chantey and modern English songs; (6) Rudolph Plamondon, well-known French Canadian tenor.

"My darling, are you happy?" "Yes, Theodore, I feel as if I'm floating in happiness. I can't feel the ground under my feet." Lustige Bache, Leipzig.

WORLD HAPPENINGS
BRIEFLY TOLD

Lady Jane Moreton, mother of Lady Byng, died at Brighton, England, very suddenly at the age of 83 years. She was the widow of Sir Richard Moreton, son of the Earl of Duke, who died in March, 1927.

William Johnson, a powder monkey when the last shots were fired in the Crimean War, and a witness of the last hanging for naval insubordination, died recently at Weymouth, England, aged 85.

The British Admiralty has announced promotion of Admiral Sir Osmond Brock to be Admiral of the Fleet, to fill the vacancy caused by transfer of Admiral Sir Charles Madden to the supplementary list.

Conceded among the ship's paint supplies, which are stored in the forepeak, 108 tins of optimum value at \$10,800 were seized by customs examiners on board the "Empress of Asia," of the Vancouver-Orient service. No arrests were made.

A sale of 62 imported cattle by H. Bull and Son, at their farm near Brampton, Ont., brought total receipts of \$80,234. It is said the sale was the largest of Jersey cattle ever held in Canada and the average price of \$1,290 has never been equalled on the continent since 1920.

Official circles have intimated that the government was considering the possibility of voluntary curtailment of naval building as a gesture supporting building suspensions announced by Premier Ramsey MacDonald, of Great Britain, and President Hoover of the United States.

Beth B. Nicholson, observer at the Mount Wilson observatory, said a gigantic spot has been seen near the equator of the sun. The spot, described as having eighty times the magnitude of ordinary sun spots, Dr. Nicholson said, was powerful enough to cause serious magnetic storms on the earth.

A Master Scientist

Dean Boyle, of Alberta University, Accepts Post of Research Council

It may be assumed that when the National Research Council of Canada is able to attract to its ranks scientists of the calibre of Dr. R. W. Boyle, M.A., Ph.D., dean of the faculties of physics and applied science at the University of Alberta, who has accepted the post of director of the physics and engineering division of the Council, it will, before long, be able to give a very good account of itself.

Dean Boyle, although only some 45 years of age, is already one of Canada's foremost scientists, ranking not far behind Professor J. C. McLennan, of the University of Toronto. During the war he showed that he was no mere theorist in his chosen work, for he rendered important service to the British Admiralty in perfecting a device for the detection of submarines. His scientific and creative mind has been responsible for devices for the detection of icebergs. He appears one of Canada's master scientists and it is fortunate that his services are now to be made available for Canada as a whole. The University of Alberta has now given two of its staff to the National Research Council. Dr. H. M. Tory, chairman of the council, is a former president of that institution.

Honey Extraction Plant

The latest machinery is being installed in the new extension to the plant of the Riedel Honey Company, at Taber, Alberta, and prospects appear to be first class. The new addition will be for honey extraction and a daily output of about 9,000 pounds is expected during the active season.

Sheep Shearing in Alberta

Sheep shearing in the Picture Butte District, Alberta, is now about finished. Last year there were only five flocks in the district; this year there are 23, mostly ranging in size from 35 to 150 ewes.

Want Night Air Service

Demand From Hamburg, Germany, To be Included in Present Plans

Hamburg, Germany, is demanding that it be included in the present plans for night flying services that are to cover all Europe. The proposal is the service say that the favorable position of the city with its day services does not necessitate having a place in nocturnal flights. While Hamburg authorities admit this they contend that the great importance of their city as a commercial center demands that it should be included. They point out that Hamburg is the junction for air service from Scandinavian countries, and it should at least have night-service connection with Berlin and thence via Bremen to enable passengers arriving late in the day to continue their journey.

Church Collections Suffer

Using Big Kitchens Instead Of Quarters In Offerings At Ottawa

Governments have been blamed for troubles a plenty, but Canada's law-makers are cited as the cause of a new ill. Decrease in church collections is the latest trouble laid at the door of the Dominion Government, and an Ottawa churchman has made the charge.

With the advent of the "big nickel," church collections have fallen off, a preacher stated today at a regular Sunday service. "The large five-cent piece," he said, "are dropped into the collection plate with a flourish that belongs to nothing less than a quarter. I don't blame the smaller collections on the people, I blame the Government."

HIGHLY PRIZED TROPHY

Move Being Made By City Council Of Stratford, Ontario

In reply to a resolution from the city council of Stratford, Ont., which the local council was requested to petition the Dominion Government to pass legislation by which summer time will be made effective throughout Canada, a special committee instructed the city clerk, George Beach, to obtain information as to whether Stratford council is asking for daylight saving time for the summer months only or all the year round.

In the communication received, it was pointed out by the Stratford council that the Dominion Government had already been approached and petitioned by the former body. The Regina aldermen are in favor of Dominion-wide daylight saving time being established for the summer months, but are opposed to it being effective all the year round.

This is the Baitry Trophy, presented by the chairman and president of the Canadian Pacific Railway for inter-regimental competition among pipers of Canadian Highland Regiments. It was played for at the Highland Gathering and Scottish Music Festival scheduled to be held at Banff August 30 to September 2. The gathering brings together pipers from one end of Canada to the other, from Nova Scotia to British Columbia, and is the greatest event of the year in Scottish-Canadian circles.

Riches Of Northland

Vast Treasure House Of Precious Minerals In Northern Canada

Last week Mr. W. C. Cain, Deputy Minister of Lands and Forests of Ontario, who has been studying northern Ontario all his life and is an enthusiast for that country, stated that in his recent trip to the far north he was given a picture of northern possibilities that was beyond his previous ideas on the subject. Some time ago "The Financial Post" told of the existence of a vast bed of amber underneath a lake in Northern Manitoba. Already as a result of the publication of this article, which incidentally drew comments in British and American as well as Canadian papers, private parties have set on foot plans for the complete exploration of this deposit. Last week another article in this paper told of various indications of precious stones in the north and even suggested the possibility of diamonds being found.

Gold and silver are now common places in our northern picture and platinum is becoming almost as familiar to our mining men. Iron ore in vast quantities exists in Ungava and on the islands of Hudson Bay and aluminum can be extracted from northern clays. Copper deposits are known to exist in Northern Saskatchewan and iron ore is abundant. Circle and air voyagers have skinned down upon the surface of lakes in the far north to find nickel and other base metals.

The north is an amazing country in future wealth. Canada can no longer be regarded as a narrow belt 3,600 miles long. It is a vast country approximately 3,000 miles square, with as much promise in the far north as in the east and the west. Moose Jaw Times.

A New Safety Device

Polish Filers Make Test Of Life-Saving Overalls

"Life saving overalls," designed for trans-Atlantic liners, were given successful tests in Lake Maggiore, Italy, by two Polish filers who hope to fly from Milan to Chicago in mid-August.

The overalls are of an especially heavy rubberized fabric, equipped with handkerchiefs, linen, coral and white printed linen, purple aster geometric crepe, printed in capucine tones, and sky-blue sheer lace are distinctly smart combinations for this charming afternoon model. Pattern price 25 cents in stamps or coin (size is preferred). Wrap cloth carefully.

An added novel feature of the garment is the equipment of electric batteries and light bulbs which will be illuminated at least 60 hours. De Favour says.

Tinted Glass Air Plants

Seeds grow better under greenish-yellow glass than when under plain glass. So declare workers in a greenhouse in Germany that have been experimenting with the tinted glass. Seeds planted under the colored panes were five times as productive as those under the plain glass, and also remained green longer.

In Mammoth Cave, Kentucky, there are fish and crayfish that have no eyes.

The cow is worshipped as a sacred animal in India.

Ask Daylight Saving Act For Dominion

Move Being Made By City Council Of Stratford, Ontario

In reply to a resolution from the city council of Stratford, Ont., which the local council was requested to petition the Dominion Government to pass legislation by which summer time will be made effective throughout Canada, a special committee instructed the city clerk, George Beach, to obtain information as to whether Stratford council is asking for daylight saving time for the summer months only or all the year round.

In the communication received, it was pointed out by the Stratford council that the Dominion Government had already been approached and petitioned by the former body. The Regina aldermen are in favor of Dominion-wide daylight saving time being established for the summer months, but are opposed to it being effective all the year round.

Recipes For This Week

(By Betty Barclay)

PARSNIP SOUFFLE

Cook four medium-size parsnips in boiling water. When tender, remove the skin and rub through a colander. Mix together one teaspoon salt, one-half teaspoon pepper, one cup sugar. Add the seasonings and one tablespoon of butter to the parsnips. Melt two tablespoons of butter in a saucepan, stirring in two tablespoons of flour and one cup of milk. Be sure the mixture is thick and smooth. Add to the parsnips, together with the milk and butter, well-beaten eggs. Beat the whites of the eggs until stiff and fold into the mixture. Put in a buttered pudding dish and bake for 25 minutes in a moderate oven. Serve immediately, or the souffle will fall.

PINEAPPLE PUNCH

1 quart water.
2 cups sugar.
2 cups chopped pineapple.
1 cup orange juice.
1/2 cup lemon juice.
Boil water, sugar and pineapple 20 minutes. Add fruit juices, cool, strain and dilute with cold water if necessary. Either fresh or canned pineapple may be used.

Saskatchewan Farm Loans

Since the Farm Loans board was inaugurated in 1917, more than 4,500 farmers throughout the province of Saskatchewan had received assistance by way of loans from the board to December 31, 1928, according to the department of the treasury of that province. From the inception of the scheme to that date and December 31, 1928, about \$1,000,000 had been loaned to farmers.

Since 1918 1,250,000 houses have been built in England. Over 100,000 homes for five or six million people.

Drought Conditions In Argentina Dry Weather Causing Anxious Times For Farmers

Canadian farmers are not the anxious ones who are experiencing anxious times in connection with the prolonged spell of dry weather, according to reports received from the department of agriculture, commerce, Canada's chief competitor in the world wheat market, Argentina, has also been experiencing a prolonged drought and much anxiety is felt by the grain and cattle traders. Not only is pasturage in that country threatened, but the work of plowing and sowing for next year's major crops is held back by the hard state of the soil. In addition, wheat prices are below normal, remunerative prices to the farmers.

In the United Kingdom the ministry of agriculture reported on July 1 that continued weather conditions were adversely affecting the cereal and root crops. Wheat, barley and clover were estimated to be five per cent. below the average, and the potatoes per cent. below average. Potatoes were backward, and unless propitious weather were received, yield under average. What is known in Great Britain as "corn crops" appeared to be fairly healthy on the whole. Peas also promised an average crop.

New Zealand Must

Conserve Its Timber

Government Has Plan To Increase Three Hundred Thousand Acres

Need for conservation of the British Empire's timber, not only in the great forests of Canada, but also in New Zealand, is emphasized in the statement of Hon. W. B. Naivenu, commissioner of state forests, in 1928, in four years there will be no native timber having in New Zealand left to mill.

Mr. Naivenu recommends that the Dominion proceed at once with an extensive planting program. "A certain change of attitude is required toward the use of timber in New Zealand," said the minister. "People have been wasteful in the utilization of native timber, and that waste must be stopped. In the most favored forest districts my expert tell me that only about ten per cent of the standing timber is actually utilized in the manufacturing of lumber."

The government is going ahead with a program for the provision of 300,000 acres of state forests to be planted in pine trees. On some of the land to be reforested, the government will plant fir cones and other tree seeds obtained from British Columbia.

Prince Is Expert Typist

The Prince of Wales has been reported by an expert typist. On a recent trip to the north of England, he carried a typewriter with him, balancing it on his knees in the train and setting down his impressions of the journey.

Canada And The British Market

Quality Shipments of Farm Produce Just as Necessary as Quantity Standard in Order to Hold Trade

In a very instructive article that he has written for the Country Guide of Winnipeg, W. A. Wilson, Canadian Agricultural Products representative on the Empire Marketing Board, brings out some of the reasons why Canada is not getting a larger share of the British foodstuffs market. One point that he brings out is of very great interest; it is that quality itself is not sufficient to win the British market; there must be quantity as well.

What Mr. Wilson means is that sales contacts cannot be established and maintained in Great Britain unless there is assurance of an adequate and steady supply of the commodities sold, be it bacon, eggs, meat, salmon, or other foods. This is the reason why Canada is not leading. Mr. Wilson indicates. We have so raised the quality of our food products that they are thoroughly satisfactory to the British consumer, but we do not provide for Britain a steady supply of our goods. British quality is not sufficient to win the British market; there must be quantity as well.

Mr. Wilson believes that Canada, in improving the quality of some of its products, has shown ability in leadership and leadership, he considers it quite as necessary to assume that Canada can work out the problem of quality production that is necessary to hold the British market.

To judge from the article one would assume that all that is necessary to overcome Canada's handicap is to lessen the inertia of the Canadian farmer and farm organizations. If the problem does not go deeper than that, it will be no difficult to solve. The Department of Agriculture at Ottawa and in each of the provinces and the various farm organizations have a tremendous opportunity to do in expanding Canada's export trade.

Made-in-Canada Exhibition

Will Show Public Quality Of Goods Produced in Dominion

Co-operation of various bodies with the National Produce-in-Canada Exhibition, which will be held in Montreal from November 4 to 8, already seems assured, according to reports received by the Canadian Manufacturers' Association, Quebec Division, Montreal branch. "These reports," says the Gazette, "show the consensus of opinion strongly supporting the scheme to introduce to the public, through the medium of the exhibition, the quality and diversity of goods which are produced in Canada by Canadian manufacturers for Canadians."

WINDOLITE

MADE IN ENGLAND

COMES WITH A MESSAGE OF HEALTH

The sun is the all-powerful life producer. Nature's universal disinfectant and germ destroyer, as well as stimulant and tonic. WINDOLITE is the sun's most important ally.

Medical research has definitely proved that from the point of view of Health and Hygiene, the most effective against the sun's rays are the Ultra-Violet rays, which possess the greatest power for the prevention and cure of disease and debility.

Science has further established that ordinary window glass does not allow the passage of Ultra-Violet rays, so that by using glass we are artificially excluding these vital health-giving rays. Therefore, the invention of WINDOLITE is a discovery that is long-felt want. Exhaustive experiments have conclusively proved that it is a most effective substitute for glass, that it freely admits the Ultra-Violet rays, and that its use has a most beneficial effect on the growth and development of plants and chickens and on the health of human beings. It is the first time to have healthy light instead of darkness in their sheds.

Indeed, the discovery of WINDOLITE has during the last six years completely revolutionized the poultry business, as a new stimulus to poultry breeding, increasing the egg-laying capacity and fertility of chickens, has greatly improved the health of the flocks and is now being used in domestic and household requirements.

WINDOLITE stands for 100 per cent. sunlight. It makes light tint strong windows for cattle sheds, dairy stables, poultry houses, brooders and hatcheries, a economical, valuable, flexible and is easy to cut and fit. It is now being successfully used for nurseries, greenhouses, hotbeds, plant coverings and greenhouses. It keeps out cold and frost, and lets in the sun with its ordinary pair of netting and is easy to fit. WINDOLITE is supplied in rolls any length but in one width of 36 inches only. A square yard of WINDOLITE weighs 10 lbs. and covers a square yard of glass of ordinary thickness, weighs 100 lbs. WINDOLITE is made in England.

Price \$1.50 Per Square Yard, f.o.b., Toronto.

The Singing Fool

By HUBERT DAHL
Copyright, 1923, Warner Bros. Pictures Inc.

Marcus, the famous Broadway producer, takes a party of four to Blackie Joe's New York night club. Al Stone, Blackie's chief comedian and singing waiter, is desperately in love with Molly, the ballet singer, but she scornfully tells him never marry a waiter. After she refuses to read a love ballad he has written for her, she goes to Marcus and tries to ingratiate herself with the great producer. Marcus is in despair, but at Blackie Joe's suggestion he sings the love song himself to Molly. He is given a marvelous ovation. Grace, the cigarette girl who is deeply in love with Al, is in tears. Even Molly, who thought Marcus acted enthusiastically, who wrote that song," and Molly answers, "The waiter—but I gave him the idea."

CHAPTER VII

Marcus gazed at Molly with renewed interest.

"You gave him the idea, did you? Well, that number has a corking idea. I have a show where I can place it right now. Can you get the waiter over here? I want to talk to him."

Molly was up in a flash.

"Of course he'll come over. I'll get him for you right away."

She tripped away rapidly, heading for Al, who was still standing in the main room by the dressing-room door. The crowd was clamoring for an encore and Molly walked among the clapping customers, hardly able to credit the turn in events. One thing was certain, Al, the high rooster, was already on the high road to an immense success. If Marcus took one song he would take others that Al had written. And this was the man whose love she had scorned but a half hour before? That was the song she had refused to read and passed carelessly from her dressing table!

How would Al greet her now? She wondered as she walked toward him. Would he show plique because she had dismissed him; would his pride make him treat her coldly? Meanwhile, Blackie Joe was using his best efforts to induce Al to sing an encore.

"Go out once more, Al," he pleaded. "Give them something else—anything you do. Can't you hear how they've stopped the show for you? But Al shook his head. No, Blackie, I can't do it. I put everything I had into that song. I just can't repeat."

Blackie saw it was hopeless to argue. Al's face was white as a sheet. It was evident that the boy had drained his emotional energy to the utmost in putting the song over. Blackie turned quickly to a couple of dancing girls and ordered them on the floor.

When Pain Comes

What many people call indigestion is really a case of acid stomach. The stomach acids are too strong and too numerous. The corrective is an alkali, which neutralizes acid instantly. And the best alkali is sodium bicarbonate, known as **Phillips' Milk of Magnesia**. It has remained the standard for over 50 years since its invention. One spoonful of this harmless,

And then Molly swooped into the picture to seize Al's hands.

"Al, you were marvelous. I never heard anything like it. It's a beautiful song and every word thrilled me!"

Not until then did Al react sharply to his triumph. After all, the applause of the crowd was merely incidental, he had really been singing to Molly, and to her alone. And here she stood, looking up at him with gentle, understanding eyes, contentedly near and dear to him. He tightened his grip on her hands and murmured earnestly.

"You see—now—how I feel!"

There was burning devotion in his face with gentle, understanding eyes, contentedly near and dear to him. He tightened his grip on her hands and murmured earnestly.

"You see—now—how I feel!"

There was burning devotion in his face with gentle, understanding eyes, contentedly near and dear to him. He tightened his grip on her hands and murmured earnestly.

There was burning devotion in his face with gentle, understanding eyes, contentedly near and dear to him. He tightened his grip on her hands and murmured earnestly.

There was burning devotion in his face with gentle, understanding eyes, contentedly near and dear to him. He tightened his grip on her hands and murmured earnestly.

At the Marcus table Al was quickly introduced. Then the producer came directly to the point.

"You have some great catch lines in that number," he said, "and a good melody. I want it for my revue and I'll get it published for you."

Al sat down, facing Marcus. He was awed and fascinated by the man's appearance and outstanding manner. He knew Marcus by reputation—everybody in New York did—but he was not prepared for the man's way of talking. He was a mere singing waiter. Yet he was blind with Al by his adoration for his hand, it never occurred to him to think she was playing up to him because of Marcus's suddenly bestowed approval.

As Al faced the producer he felt Molly's hand, slipped surreptitiously and confidently into his own. He smiled happily and answered Marcus:

"But you know, that's not my song."

"Not your song?" repeated Marcus, obviously puzzled. Then he glanced toward Molly. "You say it's yours?"

"Yes, I wrote it," added Al quickly. "But it's really Molly's song. I wrote it for her—I couldn't have written it without her."

Marcus waved the remark aside. He wasn't interested in the sentimental reason for the song's creation.

"I don't care about that—you turned out the words and music. I want the number. I want all you can write like it. If you can hold it up to that level and repeat consistently I can make your fortune for you."

Marcus spoke convincingly. Al realized that he meant every word. He was determined that he should share in any success that came to him. He decided to speak plainly.

"I want Molly to sing everything I write," he asserted. "I want you to have the song, but if you take it you'll have to take Molly too."

Al thought the producer's face fell a trifle at that ultimatum.

"Don't you see," argued Al, almost vehemently, "that no one can put over my heart songs that I don't write? You've never heard his songs—his wonder! And this number was written for her."

Marcus shook his head. "But I've got a headliner of my own—I know, but Molly would be a headliner too, if you just give her a chance. Mark my words!"

Al scarcely recognized himself, taking up to this celebrity just as if Marcus didn't mean a thing to him. He felt Molly's grip on his hand and saw the light in her eyes. He knew she was writing for him.

"All right, come to my office tomorrow. Both of you."

(To Be Continued.)

The **Verrier** of **Al** comes like a flash. The night was a dream of thrilling, robbing its victim of breath. He was a man of great human aid to relieve until a trial in a matter of that remarkable preparation. Dr. J. D. Collier's Asthma Remedy. Then relief comes with a rush. Life becomes worth living, and if the remedy he used persistently, the disease is put permanently to rout. Take no substitute.

Commemorates Historic Flight Across Channel

Louis Blériot Repeats Feat Of Twenty Years Ago

Louis Blériot, French aeronautical pioneer, flew the English Channel July 27. Twenty years ago he was among the first to cross the world's airway. He was the first to make a non-stop flight across the Channel. Blériot landed close to the monument which commemorates the historic crossing and then hurried on to London where he was feted on the twentieth anniversary of his first air trip across the channel.

Case Is Settled

Bursting open the door marked "Police," the butler confronted the local lawyer.

"If a dog steals a piece of meat from my shop, is the owner liable?" he asked.

"Very well, your dog took a piece of steak worth a half a dollar about five minutes ago."

"Indeed," he returned smilingly. "Then if you give me the other half, that will cover my fee."

Wrigley's

Dry mouth and parched throat are grateful for the refreshing coolness of Wrigley's Spearmint.

Wrigley's whittens teeth, sweetens the mouth, clears the throat and aids digestion, while the act of chewing calms and soothes the nerves.

Probing Trade Secret

Experts Trying To Discover Source Of Power Possessed By Electric Eels

Six electric eels have been brought from Trinidad to the zoological gardens at Philadelphia, and a dispatch from that city declares that electrical experts will try to discover the source of the voltage electricity.

These natural electrical plants average six feet in length and six-eighths of their body space is devoted, it is explained, to current-generating apparatus. It is averred that of these eels, properly "hooked up," can light an electric bulb, run a toy train or operate an egg-beater. In their natural habitat, the eels retire to mud and "rest up" while their batteries are being recharged. How they do it, is one of the trade secrets that electrical scientists will try to persuade the visiting eels to reveal.

Her Little Boy Was Very Ill With Summer Complaint

Mrs. Ray Fisher, Lehest, Sask., writes: "My little boy was suffering from summer complaint. He got so bad there began to be traces of blood in his stool, and anything he ate would not stay on his stomach very long. He became so weak he could not stand up."

"Discouraged and in despair I sent for a bottle, not expecting any more benefit than I had from the other medicines I had tried. To my surprise I noticed a change after he had taken a few doses, and before the bottle was half used he was the same happy, robust boy he was before he took sick."

Put up only by The T. Milburn Co. Ltd., Toronto, Ont.

Outlooks Equipped With Radio

Constitute a Great Protection To Forests of Canada

Radio has become an ally of Canada's forest protection service.

Radio equipment is to be installed in towers now in the course of erection at Blomson, fifteen miles east of Cochrane, on the trans-continental railway line to Quebec, and at Little Abitibi Lake, north from the right-of-way. The code system will be used.

Already a system of radio is employed in the Red Lake District, a mining region, connected by wireless communications with a station at Sioux Lake. The new installation will be modelled upon this earlier experience with radio.

Canada Salt Production

Of the 299,445 tons of salt produced in Canada last year, the Province of Ontario accounted for 279,641 or 93.4 per cent, while Nova Scotia furnished the remainder.

Only the uninformed endure the agony of corns. The knowing ones apply **Phillips' Corn Remover** and get relief.

A great many political big game hunters are nothing but air guns.

Sprains

Use **Minard's** immediately. It soothes the pain and draws out the inflammation.

Sky Scraper Apartment For Chicago Suburbs

Buildings Do Luxe Designed Only For Wealthy Occupants

A really development group in Chicago is planning to take the skyscraper out into the country. It proposes the erection of a fifty-apartment "cloud-piercer" on a fifty-acre suburban tract "surrounded by country clubs and forest preserves. The apartment dwellers will have on their own collectively owned premises a golf course, tennis courts, a bridge path, a swimming pool and recreation fields for adults and juveniles. Their building will contain a clubhouse with dining, billiard and card rooms. Another community building a little distance away will house a drug store, delicatessen, beauty and barber shops, medical and dental offices. Thus the luxuries and conveniences of city life, plus the attractions and facilities of the spacious countryside, are promised the prospective buyers of these rural skyscraper apartments—which are being designed, it should go without saying, for "wealthy" occupants.—Brandon Sun.

CHOLERA INFANTUM

Cholera infantum is one of the fatal ailments of childhood. It is a disease that comes on suddenly, especially during the summer months and unless prompt action is taken the little one may soon be dead. Baby's Own Tablets are an excellent remedy in warding off cholera. They regulate the bowels, prevent the stomach and intestines from becoming overburdened, and neither operate nor narcotics or cathartics. They are absolutely safe, and can be given to children of any age. They are sold by all druggists or by mail by sending a box from The Dr. Williams' Medicine Co., Brockville, Ont.

Little Help For This Week

"But without faith it is impossible to please Him; for he that cometh to God must believe that He is, and that He is a rewarder of them that diligently seek Him."—Hebrews xi.

But, turn, my soul, Learn thou the beauty of Omnipotence Be strong in faith, bid anxious thoughts be still; Seek for the good and cherish it; Oppose, or bear with a submissive will.

—William Wordsworth.

To me, I confess, it seems a very considerable thing just to believe in God; difficult indeed to avoid this belief, but not easy to accomplish worthily, and impossible to compass to perfection; a thing not lightly to be done, but rather anxiously sought; not to be found at the end of any syllogism, but in the inmost recesses of purity and affection, and the sudden gift of intellect, but to be earned by a loving and brave life. It is, indeed, the greatest thing in this century, the germ of every lesser greatness.

—Anne Gilchrist.

Shows Human Intelligence

Elephant Remembered Spot Where Mate Was Killed 44 Years Ago

Alie, 110-year-old elephant, who was with Jumbo when he was killed at St. Thomas, Ont., in 1885, was back there recently. When he arrived at the spot where Jumbo was killed Alie went to her knees, stamped and whined and trumpeted shrilly, causing sight other elephants to go on a rampage. They were quelled and when Alie had to cross the same spot again she repeated her demonstration of sorrow. A dog which is Alie's constant companion was used to bring her away.

Keep Minard's Liniment always handy.

Large Trade With Orient

A large increase in the production of dry-salted herring and the development of a big trade with the Orient in this respect has been one of the striking items of progress in connection with British Columbia's fisheries in the past few years. Last year the pack of dry-salted herring in the province amounted to 107,218,000 pounds, practically all of which was sold to the Orient.

"Well, lovely daughter of the mountain, are you watering the cat?"

"Yes. Are you thirsty?"

If you can pick and choose don't choose to pick flaws.

People who weigh their words seldom speak lightly.

MAGIC BAKING POWDER

E.W. GILLET CO. LTD.
TORONTO, CAN.

Showing Great Enterprise

Poultry Raisers Would Develop Breed With Four Drumsticks

Reports from Kansas of the development of a new breed of wingless chickens have inspired Jersey poultry raisers to attempt a cross-strain in which an extra pair of drumsticks will replace the discarded wings.

Some farmers have expressed the fear that their flocks will be annihilated by the new breed, which has no wings to assist them in dodging cars, so our enterprising is seeking to originate a breed of chickens which won't cross a road.

Miller's Worm Powders are a prompt relief for the common worms in children. They are powerful in their action and, while leaving nothing to be desired as a worm expellant, have an invigorating effect upon the youthful system, remedying fever, biliousness, loss of appetite, sleeplessness, and other ailments that follow disorders caused by worms in the stomach and bowels.

New Handicraft Industry

Among the women living along the shores of the Bay of Fundy are Annapolis Basin, Nova Scotia, there is being developed a handicraft industry which is making steady progress. Under the direction of Mrs. W. C. MacPherson, 51 women are engaged in the Granville Preside Industry, making hooked rugs out of fine wools.

Vertical Aerial Photographs

Vertical aerial photographs taken in Canada during the season of 1928 by the Royal Canadian Air Force for the purpose of mapping the country, the interior, covered 31,400 square miles.

Minard's Liniment for aching joints.

Proprietors

Thursday, Sept. 12, 1929

Sergt. Purdy, A.P.P. Col-
gery, was in town, Tuesday

Miss Margaret MacCullum is
spending the week in Calgary
with her father, sister and brother
who have just arrived
from Scotland.

Born—To Mr. and Mrs. Gold-
en Barrie, Wednesday, Sept. 4,
at Medicine Hat General Hospi-
tal, a daughter.

A meeting of St. Mary's
W.A., will be held at the house
of Mrs. Hauns, September 17th,
at 3 p.m. Everybody interest-
ed in the Church please attend.

Mr. and Mrs. Don MacLear,
and daughter, Gloria, made a
trip by car to Medicine Hat,
over Sunday.

Miss Katie Howse arrived
here from Bowdrie Alberta
on Wednesday night to visit
with her mother.

The Standard Clothing Com-
pany, of Leader, are opening up
a branch store here in the
Peers' building.

Rev and Mrs. G. A. Shields
and baby, and Mrs. A. R. Frost,
attended a presbytery meeting
of the United Church at Medi-
cine Hat, on Tuesday.

J. W. Wallis, O.D., opto-
metrist, will make his next
regular visit to Empress, Alta.,
Sept. 15th. Eyes examined
and glasses prescribed. Ap-
pointments at Drug Store.

Dance Next Tuesday

A dance will be held next
Tuesday in the Empress Thea-
tre by Chas's Harmony Orch-
estra. Good music and good
time for all attending.

Ranch Riders Are Injured
In Automobile Accident

As the result of an auto
accident near to Blindfuss, Jim
Spratt and Tommy McAlpine
are patients in the local hos-
pital. Spratt is said to have
been driving the car and offered
a broken collar-bone, while
McAlpine's injuries are internal
and more serious. It is said
the car over-turned, throwing
Spratt clear and pinning Mc-
Alpine underneath. Spratt
managed to lift the car with
his uninjured limb and succeed-
ed in putting the other man out,
who was in an unconscious con-
dition.

R.M. Mantario

(continued from last week)

In the event of the office not
being provided after the elapse
of two months, the Secretary
agreed to provide the building
suggested, and leave it to the
council to do what they thought
fair in the matter. It was sug-
gested that he should show the
actual cost, and that this might
be considered in the rental.

The Reves pointed out that
this was only a temporary ex-
penditure to account for the crop
conditions, and did nothing to
solve the question of proper
accommodation and fire pro-
tection for the records, for which
the present safe was now
far too small.

The office will be closed from
Aug. 11th to August 17th.
Betsy—That the rate for
municipal purposes be 7 mills;
that a special rate of 4 mill be
also struck to provide for the
compulsory levy for the Sena-
torium. This expenditure was
due to Provincial legislation;
the additional money would
have to be raised, but it should
be shown in such a way that it
was not a levy for Municipal

Sale and Redemption of
Impounded Animals

Notice is hereby given under Section
48 of The Domestic Animals Act (Muni-
cipalities) that one Dark Brown Mare,
about 1000 lbs, branded left A jaw, im-
pounded in the pound kept by W.
Gibson, Arcadia Valley, Alberta, located
on the S.W. 18-26-2, W. 4, on Satur-
day the 17th day of August, A.D. 1929,
and that the said animal was sold
on the 18th of September, 1929, to
T. Gibson, of Arcadia Valley, Alberta,
and that the said animal may be
released by the owner or on their
behalf within a period of thirty days
from the publication of this notice
in the Alberta Gazette, upon payment
of all fees and costs due to the Municipality
and the purchaser of said animal.

For information apply to the under-
signed.
